Abstract (en)
Heterophasic polypropylene resin comprising at least a first phase comprising a propylene homo- or copolymer (A) and a second phase comprising a polyethylene homo- or copolymer (B), the second phase being present in the form of particles being dispersed in the first phase wherein the propylene homo- or copolymer (A) has a polydispersity index of at least 7.0 Pa -1 determined according to ISO 6721-1 and heterophasic composition comprising this resin together with at least one modifier.
