Abstract (en)  
[origin: EP2348166A2] The panel (1) has a lower belt plate (2) extending in a longitudinal direction of the panel, and an upper belt plate (3) extending parallel to the lower belt plate. The plates are provided with a multi-layered structure in a height direction of the panel. The plates are provided joinably at a specific distance by multiple bars (8, 9) of predeterminable dimension along the longitudinal direction. The bars are arranged between layers of the plates, where the layers are turned to each other. The bars are selected from hall wood, board, hard fiber wood, chip board wood or metallic material.
