Abstract (en)
[origin: EP2348187A2] The box (1) has a bottom base part (8) connected with a front wall (7) in a form-fit manner, where the bottom of the shutter box is formed by multiple bottom supplement parts (9). One of the bottom supplement parts is arranged between a rear panel (5) and the bottom base part, where another one of the bottom supplement parts is arranged between the bottom base part and a front wall (6). The bottom base part is horizontally movable relative to the front wall for realizing multiple installation positions for the shutter box.
