Abstract (en)

The assembly has a centrifugal pump (4) surrounded by a tubular container (18). An axial end of the container is sealingly connected to a motor housing of a drive motor (2) e.g. canned motor and electric drive motor. Another axial end (20) of the container is connected to the former axial end in a closed manner. The container comprises a closed wall and suction and pressure openings (24, 26) that extend away from the container in a radial direction. The openings are provided with connection flanges (30). The openings are directly welded to a connection line.

Abstract (de)

Die Erfindung betrifft ein Kreiselpumpenaggregat mit zumindest einem Laufrad (8) und einem Axiallager (44) welches rotierenden (50) und einen feststehenden (48) Lagerteil aufweist, wobei sowohl der rotierende (50) als auch der feststehende (48) Lagerteil selbstausrichtend ausgebildet sind.
