Abstract (en)

[origin: WO2010046096A2] The invention relates to the use of one or more ABC siloxane elastomers in hair care preparations, said elastomers being obtained by reacting: A - organohydrogen siloxanes having at least two cyclosiloxane rings that carry SiH per molecule with; B - substances or mixtures comprising at least two aliphatic unsaturated groups or hydrocarbon groups per molecule and one; C - hydrosilylation catalyst. The preparations improve the tactile characteristics of hair that has been treated with said preparations, leaving it in particular soft, easy to comb, and/or silky.
