Abstract (en)
[origin: WO2010026078A2] The invention relates to a snow shoe (1) comprising an intermediate element (3) for connecting to a shoe (2) and comprising a support shell (5) having a front area (14) and a rear area (16). The snow shoe is characterized in that a coupling device is provided for removably fastening the intermediate element (3) to the support shell (5), wherein the coupling device comprises a binding (4) and at least one connecting part (19), and wherein the binding (4) is disposed at the support shell (5) or at the intermediate element (3) and wherein the connecting part (19) is disposed at the other respective element.
