Abstract (en)

[origin: WO2010046605A2] The invention relates to a method for controlling at least one appliance (12) for moving aircrafts (10): at least one appliance (12) connected to an aircraft is driven to a position (80) that is closer to an entry corridor (74) of a take-off runway (70) than an exit corridor (76) of the runway, and, once the appliance or each appliance is separated from the aircraft, the appliance (12) is driven to a position (82) that is closer to an exit corridor (76) of a landing runway (70) than an entry corridor (74) of said runway.
