Abstract (en)

[origin: WO2010052325A1] The device according to the invention relates to a bulk material bagging device comprising a bagging carousel (31), a dosing device and a control device, said bagging device issuing pre-defined bulk fill amounts into transport containers (21). Bagging nozzles (32) are provided at the bagging carousel, said nozzles having a pneumatic for hanging a transport container thereon. The bagging carousel (31) comprises at least one device, or a combination of the following devices: Each bagging nozzle (32) comprises at least a switch, preferably a hand switch and especially preferred a retractable hand operated lever valve (206) for actuating the pneumatics; the bagging carousel (31) comprises a foot switch for actuating the pneumatics; the bagging carousel (31) comprises a slide that is mounted prior to the bagging nozzle (32) in the transport direction of the bulk material during dosing.
