Abstract (en)

[origin: WO2010051916A1] The invention relates to a device (1) for transferring heat, having at least one heat transfer member (2), through which a first, hot fluid and a second fluid can flow in alternation. To this end, the heat transfer member (2) is a vaporizer (4) for the second fluid and is made of ceramic. Furthermore, the invention relates to an exhaust cleaning mechanism (20) and a method for transferring heat.
