Abstract (en)

[origin: WO2010060623A1] The invention relates to an access checking and control system for a delimited and fixed area, wherein the access checking and control system comprises an access barrier with a locking unit, a force sensor, a static transmission and reception unit and a mobile transmission and reception unit and a control unit. The invention also relates to the use of such an access checking and control system and also to a method for controlling such an access checking and control system.
