Abstract (en)
[origin: WO2010049541A1] The invention relates to a mouthpiece (1) for reed instruments, comprising a path (6) for impinging a reed (9) that is made to vibrate, said path forming an impingement surface and being preferably designed to be curved in convex fashion over the length of the path, characterized in that on one section (6') of the path (6) on which the reed (9) that is made to vibrate impinges, at least one recess (15) is provided which reduces the impingement surface of the section (6') of the path (6).
