Abstract (en)

[origin: WO2010057769A1] The invention relates to a device for automated mounting of alignable devices, particularly terminal blocks (1), on a mounting base, particularly on a support rail, using a mounting robot that comprises a moving gripper (4) for gripping at least one of the alignable devices in each case, wherein the gripper (4) and the device, particularly the terminal block (1), are provided with corresponding holding and mounting contours (7, 8) that interact in a form- and/or force-closed manner.
