Abstract (en)
[origin: EP2351605A2] The assembly (17) has a connecting end (19) for mounting a telescopic loading arm (18) at a frame (20) of the toy assembly, and an actuating device (21) for adjusting a loading arm-incident angle (alpha) for lifting free ends of the loading arm. A spindle (22) is supported at the frame and stands in drive connection with an actuator (23) to rotate around a spindle axis (24). A loading arm fixed connecting rod (27) cooperates with a guiding element (26) of a spindle nut (25) for guiding the connecting rod.
