Abstract (en)

[origin: EP2351896A2] The invention relates to a column system, comprising a column (10) and one or more attachment elements (11, 12) which are intended to be fitted to said column (10), wherein said column (10) is provided on its outer surfaces (outer periphery) with at least one stop (13), and one or more of said attachment elements (11, 12) are provided, on their outer surfaces, with at least one part (14), at least a portion of which, in the assembled state, adjoins the stop (13), wherein said column (10) is provided with one or more prism-shaped cavities (18) which extend towards the inside of the column (10) and of which said stops (13) form part, and wherein said attachment elements comprise slat guides, screen guides, finishing profiled sections or securing profiled sections for guiding and finishing a screen device.
