Abstract (en)
[origin: WO2010052116A1] The invention relates to a method for operating a dishwasher (GS), especially a household dishwasher, wherein a desorption process for the desorption of a reversibly dehydrogenable dry material (ZEO), especially zeolite, of a sorption drying system is generated at least temporarily. According to the invention, parameters influencing the desorption process are evaluated in order to determine when to carry out the desorption process.
