Abstract (en)

[origin: WO2010052114A1] The invention relates to a dishwasher, and a method for operating a dishwasher (GS), especially a household dishwasher, especially comprising a sorption drying system. According to said method, during at least one clear rinsing (K) program step, a liquid is applied to washed items, and then, in a drying (T) program step, the washed items are dried. According to the invention, a drip phase (AB) is carried out before the beginning of the drying (T) program step, at the beginning of which the liquid is no longer applied to the washed items and the liquid is drained from the washed items.
