Abstract (en)
[origin: WO2010060730A1] The invention relates to a method for altering the colour of keratin fibres that is kind to said fibres. The method is characterised by a two-stage application and by a combination of specific active ingredients, in particular amino acids containing hydroxyl groups and plant extracts in the colorant preparation and bioquinones in the aftertreatment agent. The invention also relates to a packaging unit comprising colorant preparations of this type and aftertreatment agents. The invention allows significantly improved fibre strength to be achieved in relation to conventional colorants.
