Abstract (en)

[origin: WO2010063514A1] A precompressed elastic element (1), particularly for fluid-operated actuators, comprising a male element (2) and a female element (3) which can slide with respect to each other. A first flange (5) formed by the male element (2) and a second flange (7) formed by the female element (3) are further provided; means (10) for snap coupling between the male element (2) and the female element (3) being provided which form extraction-preventing means.
