Abstract (en)
[origin: EP2353436A1] The fitting (12) has a combined controlling/supporting lever (27) and a control lever (28) rotatable and immovable storable around respective fixed pivot axes (25) and shelf-fixed bearing axes (26, 30). The levers are connected via a connecting element (36), which is attached to a shelf (22). The controlling/supporting lever forms a supporting arm and exhibits greater bending stiffness with respect to the control lever perpendicular to a pivot plane. The controlling/supporting lever exhibits greater length than the control lever. The control lever is formed as a flat iron bar.
