Abstract (en)
[origin: EP2353443A1] The cupboard drawer has a drawer frame (4) movably arranged in an inner space of a cupboard body (2). A furniture front (3) is supported at the drawer frame. The furniture front fits at a furniture body in the closed position of the cupboard drawer. The cupboard drawer also has two guide rails (8) associated with each other. The former guide rail is automatically movable in a relatively translatory manner in drawing direction against the latter guide rail by a locking unit during the mounting of the drawer frame at the assigned guide rail.
