Abstract (en)

The bag has microcapsules provided with a capsule shell and a microencapsulated active substance or active substance mixture. The microencapsulated active substance is applied on a material layer of the bag and/or located between material layers of the bag. The micro-encapsulated active substance contains a perfume, an antimicrobial agent, an odor-binding substance and/or an oxidizing substance. The microcapsules are fixed on a material surface in interior of the bag by gluing or introduction into a porous carrier structure.
