Abstract (en)
[origin: EP2353732A1] The discharging strip (2) has a base (7) at which discharging openings (6) are arranged next to one another and arranged opposite to supply openings (8). The base is formed by a pipe, whose axial end areas (10) are closed. The supply openings are formed at the base for homogeneous distribution of glue or adhesive in an inner area closed by the pipe. A stop bar (11) is formed by a cap, and extensions are provided for rows of openings.
