Abstract (en)

A process for handling at least one enclosure, preferably of the type of an envelope and the like, which consists in gripping, in a step a., the enclosure (A) with at least one grip element (2), at an upstream station (B) for filling and cutting the enclosure (A), particularly in an automatic machine and preferably substantially simultaneously with the cutting operations; conveying, in a step b., the enclosure (A), keeping it suspended in a controlled and predefined position preferably corresponding to the position assumed during cutting, by means of the grip element (2), along a transfer line (3) from the upstream station (B) to a downstream station (C); delivering, in a step c., the enclosure (A), keeping it in a controlled and predefined position, to the downstream station (C).
