Abstract (en)

[origin: EP2354026A1] The side folding bag has a bag body made of two front walls (1) and a carrier handle arrangement having two grip loops (4) running parallel to each other in longitudinal direction of the arranged side fold (3a) and are away from the bag body. The grip loops are fixed with their ends (5) within the range of one of the side edges (2) into the bag body and at the inner surface of the bag body. An independent claim is also included for a method for manufacturing side fold bag.
