Abstract (en)

[origin: EP2354042A1] Holding device (10) is provided for arranging one single additional container (31) inside a waste container (41). According to the present invention, holding device (10) comprises a first profile element (11), said first profile element (11) comprising an arrangement area for arranging the holding device (10) at waste container (41) and a fastening area for fastening additional container (31). Holding device (10) further comprises a second profile element (14), said second profile element (14) comprising an arrangement area for arranging holding device (10) at waste container (41) and a fastening area for fastening additional container (31). First profile element (11) and second profile element (14) are connected to one another. According to the present invention, holding device (10) comprises two legs, said first profile element (11) defining the first leg of said holding device (10) and said second profile element (14) defining the second leg of said holding device (10).
