Abstract (en)
[origin: EP2354306A2] The stone has projections (22) formed at an edge of the paving stone vertically to a top face of the stone. Width (b) of first and second rectangular portions (18a, 18b) in a direction (B), depth (d) of the projections parallel to the top face of the paving stone, a position of the projections and an angle (W) between inner edges (20) of the rectangular portions and a third rectangular portion (18c) are chosen such that adjacent paving stones are not movable together in another direction (A) to a composite of the paving stones. An independent claim is also included for a method for forming a laying packet with H-shaped or double-T-shaped paving stones.
