Abstract (en)
[origin: EP2354336A1] The assembly (1) has a frame comprising a mobile part that is displaced in vertical translation with respect to a fixed part. A partitioning element (3) is arranged between the frame and a sanitary bowl (2) and an unlocking or locking system (10) avoids or authorizes the displacement of the mobile part. Two fixation elements e.g. spacers, fix a plate (20) of the partitioning element on the mobile part, and are adjusted to adjust a fore-and-aft position of the plate. Manual gripping units (15) are integrated in the unlocking or locking system.
