Abstract (en)

The component has an exterior wall (1) and an interior wall (2) that are distinct from each other, where a lower part of the external wall is equipped with a base plate (3) that projects towards the interior wall so as to receive a lower part of the interior wall. The base plate extends orthogonally on a lower edge of the external wall. The exterior and interior walls are connected with each other through an adjustable length fixation unit. A table is rotatably equipped on a fixed frame. Independent claims are also included for the following: (1) a method for manufacturing a structural component (2) a device for manufacturing a structural component.

Abstract (fr)

La présente invention concerne un élément de construction destiné à la réalisation d'une paroi murale et constitué d'au moins deux murs distincts extérieur (1) et intérieur (2) et rendus solidaires entre eux, caractérisé en ce que ledit mur extérieur (1) comprend en partie inférieure une embase (3) saillante vers l'intérieur et conformée en L, de manière à recevoir la partie inférieure dudit mur intérieur (2).
