Abstract (en)

[origin: EP2354346A1] The component has an exterior wall (1) and an interior wall (2) that are distinct from each other, where a lower part of the external wall is equipped with a base plate (3) that projects towards the interior wall so as to receive a lower part of the interior wall. The base plate extends orthogonally on a lower edge of the external wall. The exterior and interior walls are connected with each other through an adjustable length fixation unit. A table is rotatably equipped on a fixed frame. Independent claims are also included for the following: (1) a method for manufacturing a structural component (2) a device for manufacturing a structural component.
