Abstract (en)

[origin: EP2354363A1] The system (11) has a lower insulation layer (19) formed from distribution bars (21) and a set of thermal insulation plates (23), where the bars extend transverse to rods of a framing. An upper insulation layer (22) is formed from spacer bars (27) and another set of thermal insulation plates (25), where the spacer bars extend transverse to the distribution bars. The distribution bars are connected with the spacer bars in conductors (29). Beams and frames of the conductors are formed by the distribution bars and spacer bars, respectively. The upper layer is arranged between the conductors.
