Abstract (en)  
[origin: EP2354393A1] The locking system has a locking strip (5) for locking multiple extendable furniture parts (1) that are arranged over each other. An actuator (22,25) of an ejector (21) is provided for the furniture parts, where the actuator is supported in housing (23) in a movable manner. The ejector is coupled with an activator that is arranged at the furniture parts. A blocking unit (4) is arranged at the locking strip, where the blocking unit blocks a displacement of the furniture parts towards the ejection direction (x) of the furniture parts with locking strip.
