Abstract (en)

[origin: EP2354409A1] The window has high thermal insulation coefficient which is inserted under intermediate layer of a door frame (4). One or multiple impellers are provided with insulating disks that are glued on a window sash. The disks are fitted at the outer side of a body stop with a closed impeller. The door frame has L-shaped cross-section and forms the front-sided body stop for an inserted block frame (6) with an axle stub that lies in a vertical plane.
