Abstract (en)
[origin: EP2354483A2] The muffler (1) has two frontal end bases (2), which are averted from each other and a circular casing (3), which is closed in the circumferential direction. The muffler has a muffler insert (4), an inlet pipe (5) and an outlet pipe (6). The pipe extending through the casing has a cone (10) at its inner end. The muffler insert has a counter cone (11) and the cone intervenes in the counter cone. An independent claim is also included for a method for manufacturing a muffler for an exhaust system of an internal combustion engine, particularly of a motor vehicle.
