Abstract (en)
[origin: EP2354643A2] The reflector arrangement comprises one area (2) is provided with a reflecting surface (12) for reflection of radiated light from an illuminating unit (6) which is turned. Another area (4) is provided with another reflecting surface (14) for reflection of radiated light from the illuminating unit. The former area is formed of one material which is different from other material that forms another area. An independent claim is also included for a lamp with a guiding element.
