Abstract (en)

[origin: WO2010051814A1] Natural additive with antioxidative properties for use as an additive to feed for animals, and containing natural and/or nature-identical active substances that originate from one or several of the following antioxidative elements: Blackcurrant (*Ribes nigrum*), elderberry (*Sambucus* spp.), blueberry (*Vaccinium myrtillus*), cranberry (*Vaccinium oxycoccus*; *V. microcarpum*; *V. macrocarpum*), chokeberry (*Aronia* spp., especially *Aronia arbutifolia*; *Aronia melanocarpa*), blackberry (*Rubus* spp., especially *R. plicatus* and *R. fruticosus*), cloudberry (*Rubus Chamaemorus*), cowberry (*Vaccinium vitis idaea*), crowberry (*Empetrum nigrum*), raspberry (*Rubus idaeus*), redcurrant (*Ribes rubrum*). The additive is characterized in that the antioxidative components may be derived from whole berries or leaves or an extract of the same, or from a by-product based on berries or leaves, which can originate as a residue after the removal of one or several of the content substances or by the extraction of these. The additive is effective as a supplement to feed as a replacement for traditional growth promoters when breeding domestic animals.
