Abstract (en)
[origin: WO2010052040A2] In a dishwashing machine, in particular a household dishwashing machine, having a water flow control device (5), which has a movably mounted closure element (10), which can alternately be moved into one of several control positions that are provided, in order to control a water flow from at least one water inlet (27) to at least one water outlet (13, 14, 15), and a sensor device (16, 17), which detects the closure element (10) assuming one of the control positions, the sensor device (16, 17) comprises a permanent magnet arrangement (16) and a magnetic field-detecting sensor (17).
