Abstract (en)

[origin: WO2010051990A1] The present invention relates to a sample carrier, for example, a multiwell platform having one or a plurality of recesses, in each of which there is a substance to be analyzed. The present invention also relates to a method in which one or more substances, which are in a recess in a sample carrier, are aligned on a uniform plane relative to the surface of the sample carrier before being analyzed.
