Abstract (en)

[origin: WO2010049153A1] The invention relates to a method and to a device for identifying objects (1), particularly machines, consumer items, such as bottles (1), and to parts thereof. To this end, a surface of the affected object (1) is scanned entirely, or at least in the area of a partial surface (8), wherefrom at least one result is derived. According to the invention, the natural surface of the object under inspection (1) is converted to digital characteristic values, wherein the said digital values are compiled into at least one key (9, 10).
