Abstract (en)

[origin: WO2010066712A1] The invention relates to a cable transport device, including at least one vehicle (1) suspended from at least one cable, characterised in that at least one vehicle (1) is provided with shock-absorbing means (2). The invention is suitable for any type of cable transport device with rolling or suspended vehicles, such as cable cars, gondola lifts or chairlifts either for passengers or materials.
