Abstract (en)

[origin: WO2010056188A1] The invention relates to a method and a device for load treatment of containers (1, I1, I2,...In) on board cargo ships (2) and when said containers (1, I1, I2,...In) are received stacked in vertical supports (6) extending from the cargo space (7) of the ship. According to the invention, in connection with the loading or unloading of the ship (2) in question, a crane (10) or another lifting equipment is made to collect or place spreaders (11) for container load-carrying in said supports (6) from and in, respectively, bays (12) on board the ship (2) in question or ashore.
