Abstract (en)
[origin: WO2010066370A1] The invention relates to a package for cigarettes, comprising a cup-shaped box part (11) and a lid (12) for closing the box part (11) and a collar (13) arranged in the box part (11) as a closing aid for the lid (12), wherein the package (10) comprises side walls, that is, a large-surface front wall (16), a back wall (19) on the opposite side and narrow side walls (22, 23) connecting the front wall (16) and the back wall (19), wherein the side walls extend over the box part (11) and lid part (12) and are connected by folding lines (38) to each other. According to the invention, an intermediate surface (49) is formed on two neighboring side walls (29, 30; 31, 32; 18, 30; 21, 32) and extends in a connected manner over parts of the two neighboring side walls (29, 30; 31, 32; 18, 30; 21, 32) and interrupts the folding line (38) between the two neighboring side walls (29, 30; 31, 32; 18, 30; 21, 32), wherein the neighboring side walls (29, 30; 31, 32; 18, 30; 21, 32) in the region of the intermediate surface (49) have a course that deviates from the plane of the respective side walls outside of the intermediate surface (49).
