Abstract (en)
[origin: WO2010042116A1] A side-by-side or dual pouch comprising a pair of parallel longitudinal compartments each compartment including sealed top, bottom and medial margins with the medial margins in sealed abutment and providing a sealed longitudinal strip separating the compartments. Each compartment may contain different components, such as different types of food products. A tear-promoting element appears at the outer top corner of each compartment to facilitate separate opening of each compartment and controlled dispensing of the contents.
