Abstract (en)
[origin: WO2010066436A1] The invention relates to a device and to a method for receiving highly volatile liquids, in particular for receiving alcohol from a tank truck having a degassing container, into which alcohol is conducted from the tank truck, wherein the degassing container has an alcohol inlet and an alcohol outlet. The alcohol inlet and the alcohol outlet are arranged in the lower area of the degassing container, and the device for receiving alcohol may thus be located above ground.
