Abstract (en)  
[origin: WO2010057781A2] The invention relates to a mounting arrangement (10) for solar panels (1), particularly for open-field mounting, comprising a plurality of posts (12, 14) that are arranged in pairs and are provided to rest on a foundation in each case, a plurality of rafters (20), wherein each rafter (20) connects the posts (12, 14) of a post pair to each other, a plurality of purlins (30), which are each supported on at least one rafter (20), and a plurality of solar panels (1), which are arranged on the purlins (30). The mounting arrangement (10) according to the invention is characterized in that the rafters (20) comprise a support surface (22) for the purlins (30) that is curved transversely to the extension direction of the rafters (20) at least in some sections.
