Abstract (en)  
A cage structure comprises a base (2) suitable for supporting goods (31), and a pair of sides (5) which are opposite one another, the sides (5) being movable between a folded configuration in which the sides (5) are folded on the base (2) and an open configuration in which a space for receiving goods (31) is defined between the sides (5) and the base (2), the sides (5) having respective free ends (11) which are delimited by end surfaces (12) which, in the open configuration, define a rest plane (P) for receiving a pallet (20) to be positioned on the cage structure (1).
