Abstract (en)

[origin: EP2357280A2] Cover having water-permeable road surface, comprises a water-draining binding layer (2) between a base (1) of the runway and the road surface, where the road surface consists of a porous supporting structure (4) from aggregates, and bitumen or its polymer as a binder, and an open porous surface reaction resin (5), solidifying the porous supporting structure, with an interference (6) of sand and/or coarse aggregates of different petrographic characteristics.
