Abstract (en)

[origin: EP2357305A1] Device for the support and anchorage (10) in a hanging condition of the door panel (20) in a counter-frame for sliding doors, which consists of a mechanical hooking obtained by means of a protruding fixing movable tooth (130, 140) which is hinged on a body (110) which slides within a metallic section bar (100) and is left to fall unscrewing a dowel screw (150) which supports it, entering a slit (101) obtained in the fixed section bar (100) to be then locked by the same dowel screw (150) which prevents the exit from said slit (101).
