Abstract (en)  
[origin: EP2357307A2] The sectional door comprises an integrated door (15), which is opened in the closing position of the sectional door. The sectional door leaf and the door have multiple changeable sections of panels individually connected with each other. The edge of the lower panel (10) is directed towards base of the building with an outer profile (1), which is provided with an interchangeable cover seal towards building outer side and has a base side piece towards building inner side. The outer profile and the cover seal are replace area of the door by a connection profile (2) with a seal (4).
