Abstract (en)  
[origin: WO2010043567A1] A supporting system for furniture, and a shelf adapted for such supporting system, is disclosed. The supporting system comprises a rail (11), adapted to be mounted on a wall, and a projecting male member (14), connected to the rail (11). The male member is projecting distally of said rail (11), said male member (14) being configured to interact with a mating female groove located in a shelf. The male member (14) is provided with a through slot extending from a distal end towards a proximal end of the male member (14), said through slot being open in said distal end. Also, a slider, comprising; a projecting male member (14) is disclosed.
