Abstract (en)  
[origin: WO2010057604A1] The invention relates to a device for reducing and solubilizing electronic scrap, refrigerators, vehicle tires, shredder fractions, automobile parts, mixed plastic parts, metal, profile and composite materials and the like. A container (10) having a feed opening (12) for the material to be reduced and a delivery opening (13) for the reduced material is designed with a floor (11). A driven hub (14) has striking tools (21) for effecting the material to be reduced and has baffle components (30) fastened thereto.
